## Materials

One thing that sets us apart from other kennel manufacturers are the materials that we use. By using materials that do not rot, rust, or absorb water; we ensure your investment will last as long as possible.

**Nonflammable** - will not continue to burn when source of flame is removed.

● UL 94v0

The product is nonflammable and will not continue to burn after ignition without an external fire source.

**Water / Urine resistant** - Will not absorb water/urine.

**Mold / Microbe resistant** - The materials are FDA approved for use in the food industry due to their natural anti-microbial properties.

**No Silicone** - We do not use silicone simply because it does not last. It dries out over time. If ingested by cats or dogs, a trip to the veterinarian is required.

**No lead or other heavy-metals** - no dangerous metal coatings the dogs can ingest. Materials sourced in the USA and guaranteed to be free from harmful heavy metals.

**\$75/project**

Send us your logo or design in any file format: ai, pdf, jpg, png, and we will convert it into our gate software so we can see what it might look like on a gate! We will send you renderings of what your gates will look like before we build anything.

Gator Kennels are constructed from materials that are naturally anti-microbial and easy to clean. We know the kennels are a big investment so we use materials that are designed to last as long as possible. However, there are still some chemicals and practices that can damage or prematurely age the kennels.

## Here are some things to avoid:

- The use of cleansing products containing **Chlorides, Bromides, Iodides, and Thiocyanates** can discolor and prematurely corrode the kennel (specifically the hardware). Some of these chemicals are also harmful to the animals housed in the kennels and if not rinsed correctly, can cause chemical burns!
- Animal hair should be removed. Hair can hold unwanted bacteria, urine, and molds. This increases the smell and promotes disease.
- Do not use steel-wool pads on any surface as you will scratch off any protective finish and possibly damage the kennel itself.

## These steps should prolong the life of the kennels:

- Any cleansing agent you do use should be thoroughly rinsed and NOT allowed to 'air-dry'.
- Clean off urine as soon as possible.
- Let the kennels dry between use. This not only helps protect the kennel - but it reduces the potential for bacteria or mold cross-contamination.

We found some of the **best** cleansers to use on the kennels is:

**Dawn® Dish soap or Scrubbing Bubbles®!**

Professional cleansers such as **Wysiwash®** can be used - just be sure to rinse!

## Why we like Dawn® Dish soap:

- **Dawn® dish soap** was developed specifically to break down oils. Dogs secrete oils through their skin - and rub it all over the kennels. The oil tends to attract dirt, hair, and grime. By breaking down these natural oils, the dirt, hair, and grime does not have anything to stick to - allowing for easier cleaning!
- **Dawn® dish soap** is less irritating to skin and eyes than other chemicals

## Why we like Scrubbing Bubbles®:

- **Scrubbing Bubbles®** was developed specifically to clean HDPE and aluminum
- The same exact materials our kennels are made from!
